

How can we finance adaptation measures?

Think before starting any action!

What is the actual problem and what the underlying causes?

Which adaptation options are available?

and

Think twice: Which solutions will work best? Then chose!

Define what you need in terms of

- money
- people
- knowledge

Options to implement - make your own blending!

- Mainstream into other related work programmes

- Adapt building and other regulations

- Crowdfunding

- Create own budget line

- Create specific tax or fees

Too little money available?

- Start with baby steps; show first small results

- Get buy in from politicians; find allies

- Get inspiration from others on how they managed to act

- Use it as seed money to show first results or to provide incentives, thus attracting more money

Where there is a will, there is a way!

Dealing with climate change impacts is a learning process

Tell me your local experience, let us develop ideas jointly and turn the challenges into opportunities!
